# FOREWORD

## The Hall Park McCullough Collection

It is probable that few collectors ever realize how their own personalities and intellectual bents are revealed by the things they have gathered around them. Taking the collecting world as an entity, however, the group whose interests are centered on numismatics suffers the greatest degree of exposure. There is something about a collection of coins that comes very close to summing up much of a man's true inner self. The collection assembled over many years by the late Hall Park McCullough and described in this catalogue makes for a particularly revealing study in character. After even the most superficial examination we doubt if anyone can put the catalogue down without having learned a great deal about the former owner. And without question he passes the final test with flying colors. Mr. McCullough was obviously a cultured numismatist of the highest caliber. His successors have much to thank him for.

At first glance it may come as a surprise to find that one individual could devote his attention to the coins of both the United States and Ancient Rome, two areas in numismatics almost traditionally considered to be mutually exclusive. For this reason a brief analysis of each part of Mr. McCullough's holdings may be helpful. Sooner or later most collectors pursue their hobby according to a well defined pattern. Wittingly or otherwise, some kind of a unifying theme guides their steps. Mr. McCullough's U. S. coins reflect his deep interest in the monetary and economic history of this country from Colonial days to the present. He was more attracted to what the coins represented than to the more purely numismatic aspects of rarity and condition. This led him to acquire many varieties of things — Colonial coins and notes, early Federal issues in all three metals and an impressive quantity of later Nineteenth Century material. There are some rare pieces, but few can be considered splendid. His taste for numismatic splendor remained to be satisfied, appropriately enough, by the issues of the Roman Empire.

Everyone suffers today from a devaluation of the language. All of us are too used to seeing the commonplace, or worse, described in unrealistic superlatives. Although fully aware of this unfortunate tendency, we still feel impelled to say that Mr. McCullough's Roman coins must come very close to being the finest collection of the kind ever to be offered for sale in the United States. The cataloguing of the gold alone was an exciting experience. The one hundred and one Aureii, almost without exception, are unbelievably superb. When unusually choice condition goes hand in hand with unusual rarity as represented by Aureii of Pertinax, Macrinus and Diadumenian, to name only three, no superlatives are quite adequate to the material.

Significantly enough, the taste displayed in his acquisitions of Roman gold is reflected in the extensive run of bronzes and silver Denarii. It is quite clear that Mr. McCullough looked on Roman coins as works of art and chose accordingly. As a result his bronzes are unusually fine. But the artistic was never allowed to submerge the numismatic entirely. If the Roman collection can be considered the finest to appear on the American market in point of condition, it is also one of the most complete. Mr. McCullough shows himself to have been a collector-numismatist of stature at home with the Ancient Romans. It can have fallen to the lot of few men to leave behind a more impressive personal monument.
